

# HOW TO MAKE AN APP FOR BEGINNERS

---

## Lesson 3 UIStackViews

### RECAP NOTES AND EXERCISES

## Key Concepts

1. Stack Views are a user interface element that acts like a container for other elements.
2. Its purpose is to arrange the elements inside of it either side by side horizontally or vertically, one on top of another.
3. The Stack View element has properties for you to configure spacing and alignment of the elements inside of it
4. The Axis property of the Stack View determines if the elements are arranged vertically or horizontally.
5. The Distribution property determines how much space to give/allocate to each element inside of it.
6. The Alignment property determines how to align elements inside of it.

## Exercises
